Education

Peking University Sep 2023–Jun 2027 (expected)
B.S. in Computer Science and Technology; B.Econ. in Economics Beijing, China
GPA: **3.836/4.0** · Rank: **Top 10%**

Selected Coursework:
Computer Science: Data Structures and Algorithm A (96), Introduction to Computer Systems (91), Operating System (93), Computer Networks (96), Algorithm Design and Analysis (94), Introduction to Computer Vision (94), Introduction to Artificial Intelligence (94).
Mathematics: Linear Algebra A (91), Discrete Mathematics (92), Probability Theory and Statistics (91).
Economics and Finance: Intermediate Microeconomics (96), Intermediate Macroeconomics (97), Econometrics (100), Game Theory (94), Investment Analysis: From Theory to Practice (99).

Publications

ZETA: A Controlled Study of Zero-Shot Cross-Embodiment VLA Transfer for Tabletop Manipulation **CoRL 2026 Spotlight**
Mi Yan*, **Wenhao Zhang***, Zhiqi Zhang*, Yu Peng*, Tangxinyu Wang*, Lingfei Zhai, Jiayi Su, Shengliang Deng, Lin Peng, Yaowei Liu, Yuxing Chen, Zhiyuan Wei, Jilong Wang, Jiayi Chen, Jiangran Lyu, Zhizheng Zhang†, He Wang†

StereoVLA: Enhancing Vision-Language-Action Models with Stereo Vision **RSS 2026**
Shengliang Deng*, Mi Yan*, Yixin Zheng*, Jiayi Su, **Wenhao Zhang**, Yitao Zeng, Xiaoguang Zhao, Heming Cui, Zhizheng Zhang†, He Wang†

GraspVLA: A Grasping Foundation Model Pre-trained on Billion-scale Synthetic Action Data **CoRL 2025**
Shengliang Deng*, Mi Yan*, Songlin Wei, Haixin Ma, Yuxin Yang, Jiayi Chen, Zhiqi Zhang, Taoyu Yang, Xuheng Zhang, **Wenhao Zhang**, Heming Cui, Zhizheng Zhang†, He Wang†

*Equal contribution. †Corresponding author.

Research Experience

Galbot · *Research Intern* Sep 2025–Sep 2026
PKU-Galbot Joint Lab · Robot Learning and Embodied AI Beijing, China

ZETA: Zero-Shot Cross-Embodiment VLA Transfer Co-first author · **CoRL 2026 Spotlight**
ZETA established a controlled benchmark spanning **14 robot embodiments** to systematically investigate zero-shot VLA transfer, distinguishing strict zero-shot from pretrain-exposed protocols. Co-developed the evaluation framework and integrated diverse robot embodiments into simulation, including UR5e–UMI, GoogleRobot, and Franka–UMI. Spearheaded real-world experimentation across Galbot G1 and Franka platforms, encompassing GELLO-based teleoperation data collection, post-training, and cross-embodiment transfer evaluation. Revealed that exposure to just **5%** of target-embodiment data during pretraining improves average task progress by **13.4 percentage points**, highlighting the importance of distinguishing zero-shot protocols.

StereoVLA: Stereo-Enhanced Vision-Language-Action Model **RSS 2026**
StereoVLA incorporates geometric cues from stereo vision into VLA models to improve spatial perception and viewpoint robustness in robotic manipulation. Adapted the model post-training pipeline and extended LIBERO into **LIBERO-MV-R**, a benchmark introducing camera viewpoint shifts and object position perturbations to evaluate zero-shot generalization. The model achieved a **38.8% success rate** under a 135° viewpoint shift, compared with **6.8%** for $\pi_{0.5}$.

GraspVLA: Grasping Foundation Model Leveraging Large-Scale Synthetic Data **CoRL 2025**
GraspVLA is a grasping foundation model pretrained on **1 billion frames of synthetic action data** for open-vocabulary robotic manipulation. Refactored and open-sourced the model training codebase, making it more accessible for reproducibility and future research.

Honors and Awards

National Scholarship · **Two-time recipient** 2025, 2026
One of China's most prestigious undergraduate scholarships, recognizing exceptional academic achievement and overall excellence. At PKU, this award is granted annually to approximately the **top 3%** of undergraduates.

Peking University Merit Student · **Three-time recipient** 2024, 2025, 2026
University-wide honor recognizing academic excellence, well-rounded development, and community contributions; awarded to no more than **14%** of eligible students within each department.

Yanchuang Capital Scholarship 2024
Merit-based scholarship funded by a corporate donation and awarded by the university in recognition of academic excellence (approximately **top 10%**).

Leadership and Service

Student Union, School of EECS, Peking University · *Member* Sep 2023–Jun 2024
Supported the operation of the school's official WeChat account, assisting with content editing, article formatting using Xiumi, and publication.

Technical Skills and Languages

Programming: Python, C/C++, R, Stata, Assembly
Tools: Linux, Git, Docker, LaTeX
Languages: Chinese (native), English (TOEFL 107), Japanese (JLPT N4), Spanish (basic; currently learning)
